

# STATE OF THE WATERSHED PRESENTATION

PRWC will provide a **summary of the health of local streams and aquifers** through the findings of the organization's recent scientific field research.

## Topics Covered:

- **Findings of the ambient water quality monitoring program**
  - ▶ bacteria and nitrate sampling
  - ▶ stream temperature monitoring
  - ▶ aquatic life assessments
  - ▶ streamwalk surveys
- **Stormwater runoff management**
- **Road-stream crossing infrastructure in the community**
- **Impacts of recent drought and flooding events**

Attendees will also have the opportunity to learn **strategies they can implement to maintain and improve water quality.**

7 PM  
**25**  
JANUARY
